

In the Claims

Please amend the claims as follows:

1. (Currently Amended) A shaving head comprising at least two blade-shaped cutting members each having a straight cutting edge extending parallel to a longitudinal direction of the shaving head, each cutting member being supported in a cartridge of the shaving head by a supporting member supporting the respective cutting member in a supported area on the respective cutting member, said supported area extending over a predetermined distance perpendicular to the longitudinal direction, and each supporting member having a first portion in contact with said supported area remote from the cutting edge of the respective cutting member and a second portion in contact with said supported area near the cutting edge of the respective cutting member, said first portion having a basic uniform cross-sectional area, seen perpendicularly to the longitudinal direction, and said second portion having a reduced cross-sectional area compared to the basic uniform cross-sectional area of the first portion, wherein the second portion of the supporting member of at least one of the cutting members extends over at least half of said predetermined distance.
2. (Previously Presented) A shaving head as claimed in claim 1, wherein the second portion of the supporting member of each cutting member extends over at least half of said predetermined distance.
3. (Previously Presented) A shaving head as claimed in claim 1, wherein the second portion is a wedge-shaped portion.
4. (Previously Presented) A shaving head as claimed in claim 1, wherein the second portion is a toothed portion.

5. (Previously Presented) A shaving head as claimed in claim 4, wherein the toothed portion comprises wedge-shaped teeth.

6. (Previously Presented) A shaving device having a grip and a shaving head releasably mounted to the grip, wherein the shaving head is a shaving head as claimed in claim 1.
